CERTIFICATIONS

Web Design
SAGA - School of Art, Games and Animation
(February 02, 2018)

I'm a software engineer with a focus on front-end, and I'm looking for opportunities to grow professionally and personally. And I know that this will come through challenges and I'm eager to face them. I'm also always looking to improve my skills with courses and knowledge about the technologies I work with and those emerging on the market. My best qualities are generosity, leadership, perseverance, communication and proactivity.

WORK EXPERIENCE

7COMm - People and Tech to Transform
Front End Developer
(November 11, 2021 - Present)

Here I work with React, React Native, Redux, Javascript, Typescript and Material UI. My responsibilities are to develop new features, fix bugs and improve the code base. To make these improvements, I use technology best practices and software development best practices. To do this, I interact with the team and those responsible for the product to understand the needs and the best way to implement the features. Software development using React, React Native and Redux; Software maintenance using React, React Native and Redux; Versioning with git, github, gitlab and azure; scrum and kanban methodologies;
